

# World's Smallest Public Address System

## For Improved Communication

## Spokeman Voice Amplifier

**TEACHING** as a profession is not an easy task. With changing factors such as bigger classrooms, upgrading of school compound, and additional work-load / activities require more energy from individuals. Prolonged exertion of vocal cords can drain much energy and might also lead to vocal related complications.

Many teachers have resolved this problem by getting teaching aids to lessen the burden of their pressure and work-load. Especially for those who are suffering from prolonged vocal related problems, getting a portable voice-projecting device is a wise way to cure the root of the problem. Why wait? Prevention is always better than cure!

### IN THE CLASSROOM

Voice Amplifier (MA 2800) is an excellent device for increasing the volume of the voice for any teacher. Student comprehension is directly related to how well a student can hear their teacher. Teachers with low voice volume benefit from daily use of the Voice Amplifier, Teachers with large classrooms or a large number of students benefit from the added volume. Teachers who are suffering from common cold or laryngitis also benefit from the Spokeman Voice Amplifier.

**The Spokeman Voice amplification technology can be used in classroom settings, auditoriums, in the gym, outside on the activities field, on the bus and on field trips.**

### VOICE AMPLIFIER BENEFITS

#### REDUCED STRAIN :

Reducing voice strain reduces your chances of having Voice Nodules. Voice Nodules are caused by vocal strain over a number of years and affect many educators and public speakers. Once Voice Nodules are removed the damage is permanent and in most cases affects vocal volume and clarity. MA 2800 is the only device that combats the formation of Voice Nodules. In essence MA 2800 is inexpensive insurance for your vocal chords.

In the case of Voice Nodules, low voice levels or speech related problems, MA 2800 can assist in reducing future voice strain while giving the user an effective communication tool to reach students through the medium of voice.

#### ASSISTS WITH TEACHING AND LEARNING :

Student comprehension and learning are directly related to how well a teacher can be heard by their students. MA 2800 promotes effective learning through clear communications to your students. MA 2800 also reduces the strain on the students to hear what the teacher is saying even if they are in the back of the class. This assists the teacher in keeping the attention of students who previously lost interest because they had problems hearing or understanding their teacher.

#### SAVES TIME AND ENERGY :

Using Spokeman Voice Amplifier reduces the strain on your voice when communicating with your students and reduces the number of times you have to repeat your communicated ideas. This leaves you with more energy to do activities at the end of the day without feeling drained from having to constantly strain your voice.

#### KEC Voice Amplifier

Model : MA - 2800

- World's smallest and lightest PA system
- Clear Voice Projection
- Health for Vocal Cords
- Energy saver to help you tackle your day
- Student can hear and understand you better
- Portable and can be taken almost anywhere

EFFECTIVE FOR AN AUDIENCE  
OF 100 TO 120 PEOPLE

The cost of the SPOKEMAN VOICE AMPLIFIER in no way can be compared to its Educational, Medical & Personal benefits to Educators

## Convenience at your disposal

The voice amplifier weighs simply 175 grams but is packed with most complex circuitry designs to ensure simple operation. Easy to use and ergonomically designed for comfort and style.

## Mind of its own

Don't worry about over-charging, as the amplifier will cease charging by itself upon full charge. It will notify you with a flick of indicator light from 'red' to 'green'.

## Easy on your pocket

How about a 1000 charging cycle for the rechargeable batteries? This works out to 'zero' maintenance cost for the next three years.

## Features

- Adjustable strap with quick release buckles (sling across the body or waist)
- Stainless steel belt clip for easy fastening
- Flexi-arm neck-worn microphone piece for comfortable wearing
- Uni-directional condenser capsule to minimise unwanted interference
- AFC (anti-feedback circuitry) technology to improve gain before feedback
- ABS body for better sound reproduction
- Enhanced components employed for critical parts prone to wear and tear
- Auto-switching power supply that works in any country

## Specification

Dimension : 83(W) x 84(H) x 33(D) mm

Weight 175 grams (including batteries)

## Power Management

Battery  
4 x AAA Ni-MH

## Usage Time

Indoor - 10 Hours  
Outdoor - 6 Hours

## Charging Time

4-8 Hours

Model : MA - 2800

The Components used in the Voice Amplifier are of INTERNATIONAL STANDARD and HIGH QUALITY Workmanship with Zero Defect

## Wireless PA Speaker-EVO 1.1

“Big Sound” does not always come from “Big Speakers”

Through this compact active speaker stands under a foot tall and weighs less than 3 kg, its twin projectile speaker cone can generate a high crystal clear output that gives similar bulkier equipment a run for their money. For easy usage and handling, its VHF wireless microphone unit gives you noiseless operation within a stable receiving radius of 100 feet.

The whole machine runs either on direct AC current or lead-acid rechargeable battery pack for outdoor applications. The Slot-In rechargeable battery pack is readily replaceable from its battery compartment. The system is complete with a control panel behind the speaker unit. It allows for additional microphone input, auxiliary input for music reproduction, line output for connection to other system and external speaker output too!

## Features :

- High 30 watts power output
- Twin projectile speaker driver
- Stable VHF wireless band
- Rechargeable in built lead-acid battery
- One hand-held transmitter

EVO 1.1. Wireless PA Speaker : 1 x VHF Mic

## Specifications

Dimensions : 220 (W) x 290 (H) x 130 (D) mm

Weight 2.4. kg (EVO 1.1) 2.7 kg (EVO 1.1C)

## Power Management

Battery  
1 x 12V 2Ah

## Charging Time

8-12 Hours

## Usage Time

Talking - 8 Hours  
Music - 4 Hours.-
